## **Profile**

A highly motivated software developer with four years of project-based experience in Java, C#, and Python, recognized for strong problem-solving and debugging skills. Proficient in both front-end and back-end development, with a record of mentoring peers in resolving logical and syntactical challenges. Currently enhancing technical expertise at a new institution, and seeking a four-month co-op or internship to apply these skills, collaborate on innovative projects, and deliver impactful software solutions
